126DA Communications standards and operation

- (1) After consulting with persons likely to be affected, the Comptroller-General of Customs must determine, and cause to be published in the *Gazette*:
 - (a) the information technology requirements that have to be met by persons who wish to communicate with the Department electronically; and
 - (c) the information technology requirements that have to be met to satisfy a requirement that a person's signature be given to the Department in connection with information when the information is communicated electronically; and
 - (d) the information technology requirements that have to be met to satisfy a requirement that a document be produced to the Department when the document is produced electronically.
- (2) The Comptroller-General of Customs may:
 - (a) determine alternative information technology requirements that may be used; and
 - (b) without limiting paragraph (a), determine different information technology requirements that may be used in different circumstances or by different classes of persons.

Section 126DB

126DB Authentication of certain electronic communications

An electronic communication that is made to the Department and is required or permitted by this Act is taken to be made by a particular person, even though the person did not authorise the communication, if:

- (a) the communication meets the information technology requirements that the Comptroller-General of Customs has determined under section 126DA have to be met to satisfy a requirement that the person's signature be given to the Department in connection with information in the communication; and
 - (b) the person did not notify the Department of a breach of security relating to those information technology requirements before the communication;
- unless the person provides evidence to the contrary.

126DC Records of certain electronic communications

- (1) The Comptroller-General of Customs must keep a record of each electronic communication made as required or permitted by this Act. The Comptroller-General of Customs must keep the record for 5 years after the communication is made.

Note: It does not matter whether the communication is made to the Department or by the Department or a Collector.

Evidentiary value of the record

- (2) The record kept is admissible in proceedings under this Act.
- (3) In proceedings under this Act, the record is prima facie evidence that a particular person made the statements in the communication, if the record purports to be a record of an electronic communication that:
 - (a) was made to the Department; and
 - (b) met the information technology requirements that the Comptroller-General of Customs has determined under section 126DA have to be met to satisfy a requirement that

Section 126DD

the person's signature be given to the Department in connection with information in the communication.

- (4) In proceedings under this Act, the record is prima facie evidence that the Department or a Collector made the statements in the communication, if the record purports to be a record of an electronic communication that was made by the Department or a Collector.

126DD Authentication, records and *Electronic Transactions Act 1999*

Sections 126DB and 126DC have effect despite section 15 of the *Electronic Transactions Act 1999*.

126E Communication to Department when information system is temporarily inoperative

- (1) If:
- (a) an information system becomes temporarily inoperative; or
 - (b) an information system that has become temporarily inoperative again becomes operative;

- (c) on the Department's website; and
 - (d) where practicable, by email to persons who communicate with the Department electronically.
- (2) If an information system is temporarily inoperative, information that a person could otherwise have communicated electronically to the Department by means of the system may be communicated to the Department in either of the following ways:
- (a) if another information system by means of which the person can communicate information to the Department is operative—electronically by means of that other system;
 - (b) by document given or sent to an officer doing duty in relation to the matter to which the information relates.

Section 126F

- (3) If:

- (2) The Comptroller-General of Customs shall, in a notice under subsection (1) declaring that a period is a declared period for the purposes of this section, specify in the notice another period being a period ending before the commencement of the declared period, as the base period in relation to the declared period.

- (4) Where, during a declared period, a person enters goods for home consumption, being goods of a kind in respect of which there is no quota order in force that is applicable to that person for the declared period, the Comptroller-General of Customs may, before authority to deal with the goods is given under section 71C and whether or not the declared period has expired, make, under subsection (3), a quota order that is applicable to that person for that declared period in respect of goods of that kind, and a quota order so made shall, unless the contrary intention appears in the order, be deemed to have come into force immediately before the time of entry of the goods.
- (5) In making a quota order under subsection (3), or revoking or varying a quota order under section 132C, with respect to a person, the Comptroller-General of Customs shall have regard to the quantity of goods (if any) of the kind to which the order relates that, at any time or times during the period that is the base period with respect to the declared period to which the order relates or

- (2) Where a quota order is revoked by the Comptroller-General of Customs under this section, the revocation shall be deemed to have taken effect on the day on which the order came into force.
- (3) The revocation of a quota order under this section does not prevent the making of a further quota order that is applicable to the person to whom the revoked quota order was applicable and that has effect with respect to the declared period in respect of which the revoked quota order had effect, whether or not the kind of goods to which the further quota order relates is the same as the kind of goods to which the revoked quota order related.

- (1) For the purposes of the Customs Acts in their application to beer that is entered for home consumption after 31 January 1989 in a bulk container, the container in which the beer is packaged shall be treated as containing:
 - (a) if the volume of the contents of the container is nominated for the purpose of the entry, the beer is entered before 1 July 1991 and the actual volume of the contents of the container does not exceed 101.5% of the nominated volume—the nominated volume;
 - (b) if the volume of the contents of the container is nominated for the purpose of the entry, the beer is entered before 1 July 1991 and the actual volume of the contents of the container exceeds 101.5% of the nominated volume—a volume equal to the sum of:
 - (i) the nominated volume; and

- (ii) the volume by which the actual volume of the contents of the container exceeds 101.5% of the nominated volume;
 - (c) if the volume of the contents of the container is nominated for the purpose of the entry, the beer is entered after 30 June 1991 and the actual volume of the contents of the container does not exceed 101% of the nominated volume—the nominated volume;
 - (d) if the volume of the contents of the container is nominated for the purpose of the entry, the beer is entered after 30 June 1991 and the actual volume of the contents of the container exceeds 101% of the nominated volume—a volume equal to the sum of:
 - (i) the nominated volume; and
 - (ii) the volume by which the actual volume of the contents of the container exceeds 101% of the nominated volume; or
 - (e) if the volume of the contents of the container is not nominated for the purpose of the entry—the actual volume of the contents of the container;
- and duty on beer so entered shall be fixed accordingly.
- (2) For the purposes of the application of the Customs Acts in their application to beer that is entered for home consumption after 31 January 1989 in a container other than a bulk container, the container in which the beer is packaged shall be treated as containing:

- and duty on beer so entered shall be fixed accordingly.
- (3) In determining, for the purposes of this section, the volume of the contents of containers entered for home consumption, a Collector is not required to take a measurement of the contents of each container so entered but may employ such methods of sampling as are approved in writing by the Comptroller-General of Customs for the purpose.
- (4) In this section:

Division 1AA—Calculation of duty on certain alcoholic beverages

153AA Meaning of *alcoholic beverage*

In this Division:

alcoholic beverage has the meaning given by the regulations.

153AB Customs duty to be paid according to labelled alcoholic strength of prescribed alcoholic beverages

(1) If:

- (a) an alcoholic beverage is entered for home consumption or delivered into home consumption in accordance with a permission given under section 69; and
- (b) the percentage by volume of the alcoholic content of the beverage indicated on the beverage's label exceeds the actual percentage by volume of the alcoholic content of the beverage;

customs duty is to be charged according to the percentage by volume of alcoholic content indicated on the label.

(2) If:

- (a) an alcoholic beverage is entered for or delivered into home consumption in a labelled form and an unlabelled form; and
 - (b) subsection (1) applies to the beverage in its labelled form;
- then subsection (1) applies to the beverage in its unlabelled form as if it had been labelled and the label had indicated the same percentage by volume of alcoholic content as is indicated on the beverage in its labelled form.

Section 153AC

153AC Rules for working out strength of prescribed alcoholic beverages

- (1) The Comptroller-General of Customs may, by instrument in writing, determine, in relation to an alcoholic beverage included in a class of alcoholic beverages, rules for working out the percentage by volume of alcohol in the beverage.
- (2) Without limiting the generality of subsection (1), rules determined by the Comptroller-General of Customs for working out the percentage by volume of alcohol in an alcoholic beverage:
 - (a) may specify sampling methods; and
 - (b) may, for the purposes of working out the customs duty payable, permit minor variations between the nominated or labelled volume of alcohol in the beverage and the actual volume of alcohol in the beverage so as to provide for unavoidable variations directly attributable to the manufacturing process.
- (3) The Comptroller-General of Customs may make different determinations for alcoholic beverages included in different classes of alcoholic beverages.
- (4) A determination applicable to an alcoholic beverage included in a class of alcoholic beverages applies only to an alcoholic beverage in that class that is entered for, or delivered into, home consumption on or after the making of the determination.
- (5) The Comptroller-General of Customs makes a determination public:
 - (a) by publishing it; and
 - (b) by publishing notice of it in the *Gazette*.
- (6) The notice in the *Gazette* must include a brief description of the contents of the determination.
- (7) The determination is made at the later of the time when it is published and the time when notice of it is published in the *Gazette*.

153AD Obscuration

If, in the opinion of the Collector, the strength of any spirits cannot immediately be accurately ascertained by application of the rules (if any) made for that purpose under section 153AC, the strength may be ascertained after distillation or in any prescribed manner.

Division 1A—Rules of origin of preference claim goods

153A Purpose of Division

- (1) The purpose of this Division is to set out rules for determining whether goods are the produce or manufacture:
 - (a) of a particular country other than Australia; or
 - (b) of a Developing Country but not of a particular Developing Country.
- (2) Goods are not the produce or manufacture of a country other than Australia unless, under the rules as so set out, they are its produce or manufacture.

153B Definitions

In this Division:

allowable factory cost, in relation to preference claim goods and to the factory at which the last process of their manufacture was performed, means the sum of:

- (a) the allowable expenditure of the factory on materials in respect of the goods worked out under section 153D; and
- (b) the allowable expenditure of the factory on labour in respect of the goods worked out under section 153F; and
- (c) the allowable expenditure of the factory on overheads in respect of the goods worked out under section 153G.

- (c) in either case—the inner containers in which the goods are packed.

person includes partnerships and unincorporated associations.

preference claim goods means goods that are claimed, when they are entered for home consumption, to be the produce or manufacture of a preference country.

preference country has the same meaning as in the *Customs Tariff Act 1995*.

qualifying area, in relation to particular preference claim goods, means:

- (b) if the goods are claimed to be the manufacture of Canada—Canada and Australia; or

Section 153C

- (c) if the goods are claimed to be the manufacture of Papua New Guinea—Papua New Guinea, the Forum Island Countries, New Zealand and Australia; or
- (d) if the goods are claimed to be the manufacture of a Forum Island Country—the Forum Island Countries, Papua New Guinea, New Zealand and Australia; or
- (e) if the goods are claimed to be the manufacture of a particular Developing Country—the Developing Country, Papua New Guinea, the Forum Island Countries, the other Developing Countries and Australia; or

- (fa) if goods are claimed to be the manufacture of a Least Developed Country—the Developing Countries, the Forum Island Countries and Australia; or
- (g) if the goods are claimed to be the manufacture of a country that is not a preference country—that country and Australia.

total factory cost, in relation to preference claim goods, means the sum of:

- (a) the total expenditure of the factory on materials in respect of the goods, worked out under section 153C; and
- (b) the allowable expenditure of the factory on labour in respect of the goods, worked out under section 153F; and
- (c) the allowable expenditure of the factory on overheads in respect of the goods, worked out under section 153G.

153C Total expenditure of factory on materials

The total expenditure of a factory on materials in respect of preference claim goods is the cost to the manufacturer of the materials in the form they are received at the factory, worked out under section 153E.

153D Allowable expenditure of factory on materials

General rule for determining allowable expenditure of a factory on materials

- (1) Subject to the exceptions set out in this section, the allowable expenditure of a factory on materials in respect of preference claim goods is the cost to the manufacturer of those materials in the form they are received at the factory, worked out under section 153E.

Goods wholly or partly manufactured from materials imported from outside the qualifying area

- (2) If:
- (a) preference claim goods (other than goods wholly manufactured from unmanufactured raw products) are manufactured, in whole or in part, from particular materials; and
 - (b) those particular materials, in the form they are received at the factory, are imported from a country outside the qualifying area;

there is no allowable expenditure of the factory on those particular materials.

Goods claimed to be the manufacture of a Least Developed Country—special rule

- (2A) If:
- (a) goods claimed to be the manufacture of a Least Developed Country contain materials that, in the form they were received by the factory, were manufactured or produced in Developing Countries that are not Least Developed Countries; and
 - (b) the allowable expenditure of the factory on those materials in aggregate would, but for this subsection, exceed 25% of the total factory cost of the goods;

that allowable expenditure on those materials is taken to be 25% of the total factory cost of the goods.

Section 153D

Inland freight rule

(3) If:

- (a) preference claim goods are manufactured, in whole or in part, from particular materials; and
- (b) the preference country is Papua New Guinea or a Forum Island Country; and
- (ba) the goods are claimed to be the manufacture of Papua New Guinea or a Forum Island Country; and
- (c) those particular materials:
 - (i) were imported into the preference country from a country outside the qualifying area; or
 - (ii) incorporate other materials (***contributing materials***) imported into the preference country from a country outside the qualifying area;

then, despite subsection (2), the allowable expenditure of the factory on those particular materials includes:

- (d) the cartage of those particular materials; or
- (e) the part of the cost of those particular materials that is attributable to the cartage of those contributing materials;

from the port or airport in the preference country where those particular materials or contributing materials are first landed to the factory or to the plant where they are processed or first processed.

Goods wholly or partly manufactured from materials imported from outside the qualifying area—intervening manufacture

(4) If:

- (a) preference claim goods are manufactured, in whole or in part, from particular materials; and
- (b) other materials (***contributing materials***) have been incorporated in those particular materials; and
- (c) those contributing materials were imported into a country in the qualifying area from a country outside the qualifying area; and

Section 153D

- (d) after their importation and to achieve that incorporation, those contributing materials have been subjected to a process of manufacture, or a series of processes of manufacture, in the qualifying area without any intervening exportation to a country outside that area;

the allowable expenditure of the factory on those particular materials in the form they are received at the factory does not include any part of the cost of those particular materials to the manufacturer, worked out under section 153E, that is attributable to the cost of those contributing materials in the form in which the contributing materials were received by the person who subjected them to their first manufacturing process in the qualifying area after importation.

Intervening export of contributing materials

- (5) If contributing materials within the meaning of subsection (4) are, after their importation into a country in the qualifying area and before their incorporation into the particular materials from which preference claim goods are manufactured, subsequently exported to a country outside that area, then, on their reimportation into a country in the qualifying area, subsection (2) or (4), as the case requires, applies as if that subsequent reimportation were the only importation of those materials.
- (6A) If:
 - (a) goods claimed to be the manufacture of Papua New Guinea or a particular Forum Island Country are manufactured, in whole or in part, from particular materials; and
 - (b) if the qualifying area for that country consisted only of that country and Australia—under subsection (4), the allowable expenditure of the factory on those particular materials, after excluding any costs required to be excluded under subsection (4), would be at least 50% of the total expenditure of the factory on those particular materials worked out in accordance with section 153C;

Section 153E

then, despite subsection (4), the allowable expenditure of the factory on those particular materials is taken to be that total expenditure.

Waste or scrap

(7) If:

- (a) materials are imported into a country; and
- (b) the subjecting of those materials to a process of manufacture gives rise to waste or scrap; and
- (c) that waste or scrap is fit only for the recovery of raw materials;

any raw materials that are so recovered in that country are to be treated, for the purposes of this section, as if they were unmanufactured raw products of that country.

Transshipment

- (8) If, in the course of their exportation from one country to another country, materials are transhipped, that transshipment is to be disregarded for the purpose of determining, under this section, the country from which the materials were exported.

153E Calculation of the cost of materials received at a factory

Purpose of section

- (1) This section sets out, for the purposes of sections 153C and 153D, the rules for working out the cost of materials in the form they are received at a factory.

General rule

- (2) Subject to this section, the cost of materials received at a factory is the amount paid or payable by the manufacturer in respect of the materials in the form they are so received.

Customs and excise duties and certain other taxes to be disregarded

- (3) Any part of the cost of materials in the form they are received at a factory that represents:
- (a) a customs or excise duty; or
 - (b) a tax in the nature of a sales tax, a goods and services tax, an anti-dumping duty or a countervailing duty;
- imposed on the materials by a country in the qualifying area is to be disregarded.

Comptroller-General of Customs may require artificial elements of cost to be disregarded

- (4) If the Comptroller-General of Customs is satisfied that preference claim goods consist partly of materials added or attached solely for the purpose of artificially raising the allowable factory cost of the goods, the Comptroller-General of Customs may, by written notice given to the importer of the preference claim goods, require the part of that cost that is, in the opinion of the Comptroller-General of Customs, reasonably attributable to those materials, to be disregarded.

Comptroller-General of Customs may require cost over normal market value to be disregarded

- (5) If the Comptroller-General of Customs is satisfied that the cost to the manufacturer of materials in the form they are received at a factory exceeds, by an amount determined by the Comptroller-General of Customs, the normal market value of the materials, the Comptroller-General of Customs may, by written notice given to the importer of preference claim goods in which those materials are incorporated, require the excess to be disregarded.

Section 153F

Comptroller-General of Customs may determine cost of certain materials received at a factory

- (6) If the Comptroller-General of Customs is satisfied:
- (a) that materials in the form they are received at a factory are so received:
 - (i) free of charge; or
 - (ii) at a cost that is less than the normal market value of the materials; and
 - (b) that the receipt of the materials free of charge or at a reduced cost has been arranged, directly or indirectly, by a person who will be the importer of preference claim goods in which those materials are incorporated;

the Comptroller-General of Customs may, by written notice given to the importer, require that an amount determined by the Comptroller-General of Customs to be the difference between the cost, if any, paid by the manufacturer and the normal market value be treated as the amount, or a part of the amount, paid by the manufacturer in respect of the materials.

Effect of determination

- (7) If the Comptroller-General of Customs gives a notice to the importer of preference claim goods under subsection (4), (5) or (6) in respect of materials incorporated in those goods, the cost of the materials to the manufacturer must be determined having regard to the terms of that notice.

153F Allowable expenditure of factory on labour

Calculation of allowable expenditure of factory on labour

- (1) Allowable expenditure of a factory on labour in respect of preference claim goods means the sum of the part of each cost prescribed for the purposes of this subsection:
- (a) that is incurred by the manufacturer of the goods; and
 - (b) that relates, directly or indirectly, and wholly or partly, to the manufacture of the goods; and

Section 153G

- (c) that can reasonably be allocated to the manufacture of the goods.

Regulations may specify manner of working out cost

- (2) Regulations prescribing a cost for the purposes of subsection (1) may also specify the manner of working out that cost.

153G Allowable expenditure of factory on overheads

Calculation of allowable expenditure of factory on overheads

- (1) Allowable expenditure of a factory on overheads in respect of preference claim goods means the sum of the part of each cost prescribed for the purposes of this subsection:
 - (a) that is incurred by the manufacturer of the goods; and
 - (b) that relates, directly or indirectly, and wholly or partly, to the manufacture of the goods; and
 - (c) that can reasonably be allocated to the manufacture of the goods.

153LA Modification of section 153L in special circumstances

When 50% in subsection 153L(4) can be read as 48%

- (1) If the Comptroller-General of Customs is satisfied:
- (a) that the allowable factory cost of preference claim goods in a shipment of such goods that are claimed to be the manufacture of Papua New Guinea or a Forum Island Country is at least 48% but not 50% of the total factory cost of those goods; and
 - (b) that the allowable factory cost of those goods would be at least 50% of the total factory cost of those goods if an unforeseen circumstance had not occurred; and
 - (c) that the unforeseen circumstance is unlikely to continue;
- the Comptroller-General of Customs may determine, in writing, that section 153L has effect:
- (d) for the purpose of the shipment of goods that is affected by that unforeseen circumstance; and
 - (e) for the purposes of any subsequent shipment of similar goods that is so affected during a period specified in the determination;
- as if the reference in subsection 153L(4) to 50% were a reference to 48%.

Effect of determination

- (2) If the Comptroller-General of Customs makes a determination, then, in relation to all preference claim goods imported into Australia that are covered by the determination, section 153L has effect in accordance with the determination.

Comptroller-General of Customs may revoke determination

- (3) If:
- (a) the Comptroller-General of Customs makes a determination; and

Section 153M

- (b) the Comptroller-General of Customs becomes satisfied that the unforeseen circumstance giving rise to the determination no longer continues;

the Comptroller-General of Customs may, by written notice, revoke the determination despite the fact that the period referred to in the determination has not ended.

Goods are *Singaporean originating goods* if:

- (a) they are produced entirely in the territory of Singapore, or entirely in the territory of Singapore and the territory of Australia, from originating materials only; and
- (b) either:
 - (i) the importer of the goods has, at the time the goods are imported, a certification of origin, or a copy of one, for the goods; or

Change in tariff classification

- (3) If a requirement that applies in relation to the goods is that all non-originating materials used in the production of the goods must have undergone a particular change in tariff classification, the regulations may prescribe when a non-originating material used in

the production of the goods is taken to satisfy the change in tariff classification.

(4) If:

- (a) a requirement that applies in relation to the goods is that all non-originating materials used in the production of the goods must have undergone a particular change in tariff classification; and
- (b) one or more of the non-originating materials used in the production of the goods do not satisfy the change in tariff classification;

then the requirement is taken to be satisfied if the total value of the non-originating materials covered by paragraph (b) does not exceed 10% of the customs value of the goods.

(5) If:

- (a) a requirement that applies in relation to the goods is that all non-originating materials used in the production of the goods must have undergone a particular change in tariff classification; and

- (a) a requirement that applies in relation to the goods is that the goods must have a regional value content of not less than a particular percentage worked out in a particular way; and
- (b) the goods are imported into Australia with accessories, spare parts, tools or instructional or other information materials; and
- (c) the accessories, spare parts, tools or instructional or other information materials are classified with, delivered with and not invoiced separately from the goods; and

then the regulations must require the value of the accessories, spare parts, tools or instructional or other information materials to be taken into account as originating materials or non-originating materials, as the case may be, for the purposes of working out the regional value content of the goods.

Note: The value of the accessories, spare parts, tools or instructional or other information materials is to be worked out in accordance with the regulations: see subsection 153XD(3).

- (8) For the purposes of subsection (7), disregard section 153XI in working out whether the accessories, spare parts, tools or instructional or other information materials are originating materials or non-originating materials.

Goods put up in a set for retail sale

(9) If:

- (d) the total customs value of the goods (if any) in the set that are not Singaporean originating goods does not exceed 10% of the customs value of the set of goods.

Example: A mirror, brush and comb are put up in a set for retail sale. The mirror, brush and comb have been classified under Rule 3(c) of the Interpretation Rules according to the tariff classification applicable to combs.

The effect of paragraph (c) of this subsection is that the origin of the mirror and brush must now be determined according to the tariff classifications applicable to mirrors and brushes.

153XH Packaging materials and containers

- (1) If:
 - (a) goods are packaged for retail sale in packaging material or a container; and
 - (b) the packaging material or container is classified with the goods in accordance with Rule 5 of the Interpretation Rules;then the packaging material or container is to be disregarded for the purposes of this Subdivision.

Regional value content

- (2) However, if a requirement that applies in relation to the goods is that the goods must have a regional value content of not less than a particular percentage worked out in a particular way, the regulations must require the value of the packaging material or container to be taken into account as originating materials or non-originating materials, as the case may be, for the purposes of working out the regional value content of the goods.

Note: The value of the packaging material or container is to be worked out in accordance with the regulations: see subsection 153XD(3).

design means a design of a kind capable of being registered under the *Designs Act 2003*, whether or not it is registered under that Act or any other law.

payment, in relation to an amount, includes the incurring of a liability to pay, and the crediting of, the amount.

scheme means:

- (a) an agreement, arrangement, understanding, promise or undertaking, whether formal or informal, whether express or implied and whether or not enforceable, or intended to be enforceable, by legal proceedings; or
- (b) a plan, proposal, action, course of action or course of conduct, whether unilateral or otherwise.

use, includes hire-out, lease-out, rent-out, sell, market, distribute or otherwise trade in or dispose of.

- (4) For the purposes of this section, a scheme shall be taken to be entered into or carried out for a particular purpose if the person who has, or one or more of the persons who have, entered into or

Section 158

carried out the scheme or a part of the scheme did so for that purpose or for purposes including that purpose.

158 Interpretation—Transportation costs

Where the purchaser of imported goods:

- (a) has supplied any production material, production tooling or work goods in relation to those imported goods to a person in a foreign country for the purposes related to the production of those imported goods; or
- (b) has supplied any subsidiary goods to a person in a foreign country for purposes related to the production of production materials, production tooling, work goods or work services in relation to those imported goods;

references in this Division to the cost of transporting that production material or production tooling or those work goods or subsidiary goods, after its or their acquisition or production by the purchaser, to the place of production in that foreign country shall be taken to include:

- (c) the packing costs for materials and labour paid or payable by or on behalf of the purchaser in relation to that production material, or production tooling or those work goods or subsidiary goods including, but without limiting the generality of the foregoing, costs of fumigating, cleaning, coating, wrapping or otherwise preparing the material tooling or goods for transportation to the place of production of the imported goods;
- (d) any amount paid or payable by or on behalf of the purchaser in relation to that production material or production tooling or those work goods or subsidiary goods that would:
 - (i) if that foreign country were Australia;
 - (ii) if any other country from which that material or tooling or those goods were exported were a foreign country; and
 - (iii) if that material or tooling or those goods were imported goods;

- be an amount of foreign inland freight or foreign inland insurance, overseas freight or overseas insurance, or Australian inland freight or Australian inland insurance; and
- (e) all duties of Customs, sales tax, or other duties or taxes paid or payable in consequence of the importation of that production tooling or those work goods or subsidiary goods or in consequence of any other use, sale or disposition in that foreign country.

159 Value of imported goods

- (1) Unless the contrary intention appears in this Act or in another Act, the value of imported goods for the purposes of an Act imposing duty is their customs value and the Collector shall determine that customs value in accordance with this section.
- (2) Where a Collector can determine the transaction value of imported goods, their customs value is their transaction value.
- (3) Where a Collector cannot determine the transaction value of imported goods but can determine their identical goods value, their customs value is their identical goods value.
- (4) Where a Collector:
 - (a) cannot determine the transaction value of imported goods; and
 - (b) cannot determine their identical goods value;but can determine their similar goods value, their customs value is their similar goods value.
- (5) Where a Collector:
 - (a) cannot determine the transaction value of imported goods, not being computed valued goods;
 - (b) cannot determine their identical goods value; and
 - (c) cannot determine their similar goods value;but can determine their deductive (contemporary sales) value, their customs value is their deductive (contemporary sales) value.

Section 159

- (6) Where a Collector:
- (a) cannot determine the transaction value of imported goods, not being computed valued goods;
 - (b) cannot determine their identical goods value;
 - (c) cannot determine their similar goods value; and
 - (d) cannot determine their deductive (contemporary sales) value;
- but can determine their deductive (later sales) value, their customs value is their deductive (later sales) value.
- (7) Where a Collector:
- (a) cannot determine the transaction value of imported goods, not being computed valued goods but being request goods;
 - (b) cannot determine their identical goods value;
 - (c) cannot determine their similar goods value;
 - (d) cannot determine their deductive (contemporary sales) value; and
 - (e) cannot determine their deductive (later sales) value;
- but can determine their deductive (derived goods sales) value, their customs value is their deductive (derived goods sales) value.
- (8) Where a Collector:
- (a) cannot determine the transaction value of exporter's goods, not being computed valued goods;
 - (b) cannot determine their identical goods value;
 - (c) cannot determine their similar goods value;
 - (d) where they are request goods, cannot determine any of their deductive values; and
 - (e) where they are not request goods:
 - (i) cannot determine their deductive (contemporary sales) value; and
 - (ii) cannot determine their deductive (later sales) value;
- but can determine their computed value, their customs value is their computed value.

- (9) Where a Collector:
- (a) cannot determine the transaction value of imported goods, being computed valued goods;
 - (b) cannot determine their identical goods value; and
 - (c) cannot determine their similar goods value;
- their customs value is their computed value.
- (10) Where a Collector:
- (a) cannot determine the transaction value of imported goods;
 - (b) cannot determine their identical goods value;
 - (c) cannot determine their similar goods value;
 - (d) where they are request goods, cannot determine any of their deductive values;
 - (e) where they are not request goods:
 - (i) cannot determine their deductive (contemporary sales) value; and
 - (ii) cannot determine their deductive (later sales) value; and
 - (f) where they are exporter's goods, cannot determine their computed value;
- their customs value is their fall-back value.

160 Inability to determine a value of imported goods by reason of insufficient or unreliable information

- (1) Where a Collector is not satisfied that there is sufficient reliable information available to the Collector, being information of a kind referred to in subsection (2), to enable him or her to determine a value of imported goods in accordance with a provision of this Division for determining their customs value, the Collector may determine, in writing, that he or she is not so satisfied and the Collector shall thereupon be taken to be unable to determine that first-mentioned value.
- (2) Where a Collector is not satisfied that there is sufficient reliable information available to the Collector to enable him or her to determine the quantity and correctness of any amount that is required to be taken into account in determining a value of those

Section 161

goods in accordance with a provision of this Division for determining the customs value of imported goods, then:

- (a) where that amount would ordinarily form part of their customs value under the particular valuation method set out in that provision—the Collector shall determine, in writing, that he or she is not so satisfied and the Collector shall thereupon be taken to be unable to use that method;
- (b) where that amount would ordinarily be deducted from the amount that would otherwise be their customs value under the particular valuation method set out in that provision:
 - (i) if the Collector determines, in writing, that he or she is not so satisfied and that he or she does not desire to use the method—the Collector shall thereupon be taken to be unable to use that method; and
 - (ii) if the Collector determines, in writing, that he or she is not so satisfied but that he or she desires to use the method—the Collector may use the method but no deduction shall be allowed on account of that amount.

161 Transaction value

- (1) The transaction value of imported goods is an amount equal to the sum of their adjusted price in their import sales transaction and of their price related costs to the extent that those costs have not been taken into account in determining the price of the goods.

- (2) In this section:

adjusted price, in relation to imported goods, means the price of the goods determined by a Collector who deducts from the amount that, but for this subsection, would be the amount of that price, such amounts as the Collector considers necessary to take account of the following matters:

- (a) deductible financing costs in relation to the goods;
- (b) any costs that the Collector is satisfied:
 - (i) are payable for the assembly, erection, construction or maintenance of, or any technical assistance in respect of, the goods;

Section 161A

- (ii) are incurred after importation of the goods into Australia; and
- (iii) are capable of being accurately quantified by reference to the import sales transaction relating to the goods;
- (c) Australian inland freight and Australian inland insurance in relation to the goods;
- (d) deductible administrative costs in relation to the goods;
- (e) overseas freight and overseas insurance in relation to the goods.

161A Identical goods value

- (1) The identical goods value of imported goods is their value calculated as if the value of each of their units were:
 - (a) the unit price of comparable identical goods; or
 - (b) if, because 2 or more lots of goods are treated as comparable identical goods, there are 2 or more such unit prices—the lower or lowest of those unit prices.

- (2) In this section:

comparable identical goods, in relation to imported goods, means identical goods that a Collector is satisfied:

- (a) were exported to Australia about the same time as the imported goods; and
- (b) either:
 - (i) were sold in the same, or substantially the same, quantities, as the imported goods in an import sales transaction at the same trade level as the import sales transaction of the imported goods; or
 - (ii) are of a kind that reasonable inquiry by the Collector has not shown to be so sold.

unit price, in relation to comparable identical goods, means their transaction value:

- (a) adjusted to such extent as a Collector considers necessary so that that value is what it would have been if:

Section 161B

- (i) their foreign inland freight and foreign inland insurance had been what that freight and insurance would have been if the goods had been transported, and only transported, over the distances over which, and in the modes in which, the imported goods with which they are comparable identical goods were transported;
 - (ii) the trade levels of the import sales transactions of the comparable identical goods had been those of the import sales transaction of the imported goods; and
 - (iii) the comparable identical goods had been sold in their import sales transactions in the quantity in which the imported goods were sold in their import sales transaction; and
- (b) divided by the number of units of the comparable identical goods.

161B Similar goods value

- (1) The similar goods value of imported goods is their value calculated as if the value of each of their units were:
- (a) the unit price of comparable similar goods; or
 - (b) if, because 2 or more lots of goods are treated as comparable similar goods, there are 2 or more such unit prices—the lower or lowest of those unit prices.
- (2) In this section:

comparable similar goods, in relation to imported goods, means similar goods that a Collector is satisfied:

- (a) were exported to Australia about the same time as the imported goods; and
- (b) either:
 - (i) were sold in the same, or substantially the same, quantities, as the imported goods in an import sales transaction at the same trade level as the import sales transaction of the imported goods; or

Section 161C

- (ii) are of a kind that reasonable inquiry by the Collector has not shown to be so sold.

unit price, in relation to comparable similar goods, means their transaction value:

- (a) adjusted to such extent as a Collector considers necessary so that that value is what it would have been if:
 - (i) their foreign inland freight and foreign inland insurance had been what that freight and insurance would have been if the goods had been transported, and only transported, over the distances over which, and in the modes in which, the imported goods with which they are comparable similar goods were transported;
 - (ii) the trade levels of the import sales transactions of the comparable similar goods had been those of the import sales transaction of the imported goods; and
 - (iii) the comparable similar goods had been sold in their import sales transactions in the quantity in which the imported goods were sold in their import sales transaction; and
- (b) divided by the number of units of the comparable similar goods.

161C Deductive (contemporary sales) value

- (1) The deductive (contemporary sales) value of imported goods is their value calculated as if the value of each of their units were the unit price of comparable goods sold in the reference sale or sales.
- (2) In this section:

contemporary sale, in relation to comparable goods comparable with imported goods, means a sale known to a Collector of the comparable goods in Australia in the condition in which they were imported, being a sale:

- (a) at about the same time as the time of importation of the imported goods;

Section 161C

- (b) at the first trade level at which the comparable goods were sold after their importation;
- (c) in circumstances where, in the opinion of the Collector, the purchaser of the comparable goods:
 - (i) was not, at the time of the sale, related to the vendor of the comparable goods; and
 - (ii) did not incur any production assist costs in relation to the comparable goods; and
- (d) that was, in the opinion of the Collector, a sale of a sufficient number of units of comparable goods as to permit an appropriate determination of their price per unit.

reference sale, in relation to comparable goods, means:

- (a) where there was only one contemporary sale of the goods—that sale;
- (b) where:
 - (i) there were 2 or more such sales; and
 - (ii) the comparable goods were sold in those sales at the one unit price;each of those sales;
- (c) where:
 - (i) there were 2 or more such sales;
 - (ii) the comparable goods were sold in those sales at 2 or more unit prices; and
 - (iii) a higher number of units of comparable goods were sold in those sales at one of those unit price than were sold in those sales at any other single particular unit price;the sale, or each of the sales, in which comparable goods were sold at the particular unit price first-mentioned in subparagraph (iii);
- (d) where:
 - (i) there were 2 or more such sales;
 - (ii) the comparable goods were sold in those sales at 2 or more unit prices; and

Section 161C

- (iii) an equal number of units of comparable goods were sold in those sales at each of those unit prices;
the sale or sales in which the comparable goods were sold at the lower or lowest of the unit prices; and

(e) where:

- (i) there were 2 or more such sales;
- (ii) the comparable goods were sold in those sales at 2 or more unit prices; and
- (iii) an equal number of units of comparable goods were sold in those sales at 2 or more of those unit prices and that number was not exceeded by the number of units of comparable goods sold in those sales at any other single particular unit price;
the sale, or sales, at which comparable goods were sold at the lower or lowest of the unit prices first-mentioned in subparagraph (iii).

unit price, in relation to comparable goods sold in a contemporary sale, means the price of the goods in that sale:

- (a) reduced by the sum of value unrelated amounts, deductible administrative costs, and deductible financing costs, in relation to the comparable goods; and
 - (b) divided by the number of units of the comparable goods.
- (3) The following example illustrates the operation of paragraph (c) of the definition of **reference sale** in subsection (2):

Facts:

There were 2 contemporary sales of 5 units of comparable goods at a unit price of \$100.

There were 6 contemporary sales of 3 units of comparable goods at a unit price of \$40.

There was one contemporary sale of 4 units of comparable goods at a unit price of \$40.

There was one contemporary sale of 7 units of comparable goods at a unit price of \$60.

Section 161C

There were 3 contemporary sales of 2 units of comparable goods at a unit price of \$60.

This means that:

10 units of comparable goods were sold in contemporary sales at \$100.

22 units of comparable goods were sold in contemporary sales at \$40.

13 units of comparable goods were sold in contemporary sales at \$60.

Result:

More units of comparable goods were sold in contemporary sales at \$40 than were sold in such sales at any other unit price.

Therefore, the reference sales are the sales at the unit price of \$40.

- (4) The following example illustrates the operation of paragraph (e) of the definition of *reference sale* in subsection (2):

Facts:

There was one contemporary sale of 10 units of comparable goods at a unit price of \$60.

There were 2 contemporary sales of 2 units of comparable goods at a unit price of \$20.

There was one contemporary sale of 6 units of comparable goods at a unit price of \$20.

There were 8 contemporary sales of 1 unit of comparable goods at a unit price of \$80.

There was one contemporary sale of 5 units of comparable goods at a unit price of \$70.

There were 2 contemporary sales of 2 units of comparable goods at a unit price of \$70.

There were 2 contemporary sales of 1 unit of comparable goods at a unit price of \$50.

There were 2 contemporary sales of 4 units of comparable goods at a unit price of \$50.

Result:

Section 161D

An equal number of units of comparable goods (10) were sold in contemporary sales at 3 unit prices (\$60, \$20, \$50).

This number is not exceeded by 8 units of comparable goods sold in contemporary sales at \$80 or by 9 units of comparable goods sold in contemporary sales at \$70.

Therefore, reference sales are the sales at the unit price of \$20.

161D Deductive (later sales) value

- (1) The deductive (later sales) value of imported goods is their value calculated as if the value of each of the units were the unit price of comparable goods sold in the reference sale or sales.

- (2) In this section:

later sale, in relation to comparable goods compared with imported goods, means a sale known to a Collector of the comparable goods in Australia in the condition in which they were imported, being a sale:

- (a) during the 90 days that began on the day of importation of the imported goods;
- (b) at the first trade level at which the comparable goods were sold after their importation;
- (c) in circumstances where, in the opinion of the Collector, the purchaser of the comparable goods:
 - (i) was not, at the time of the sale, related to the vendor of the comparable goods; and
 - (ii) did not incur any production assist costs in relation to the comparable goods; and
- (d) was, in the opinion of the Collector, a sale of a sufficient number of units of comparable goods as to permit an appropriate determination of their price per unit.

reference sale, in relation to comparable goods, means:

- (a) where there was only one later sale of the goods—that sale;
- (b) where there were 2 or more such sales and one of them was on an earlier day than the other or others—that sale; or

Section 161E

- (c) where there were 2 or more such sales on a common day and no such sale occurred on an earlier day:
 - (i) if one of the sales on the common day was of a higher number of units of the comparable goods than the other or others on the common day—that sale of a higher number; or
 - (ii) if 2 or more of the sales on the common day were of the same number of units of comparable goods and no other sale on the common day was of a higher number of such units—whichever of those 2 or more sales of the same number of units was the sale in which comparable goods were sold at the lower or lowest unit price.

unit price, in relation to comparable goods sold in a later sale, means the price of the goods in that sale:

- (a) reduced by the sum of value unrelated amounts, deductible administrative costs, and deductible financing costs, in relation to the comparable goods; and
- (b) divided by the number of units of the comparable goods.

161E Deductive (derived goods sales) value

- (1) The deductive (derived goods sales) value of imported goods is their value calculated as if the value of each of their units were the unit price of derived goods derived from them sold in the reference sale or sales.
- (2) In this section:

derived goods, in relation to imported goods, means the imported goods after they have been assembled, packaged or further processed in Australia.

derived goods sale, in relation to derived goods derived from imported goods, means a sale known to a Collector of derived goods in Australia, being a sale:

- (a) during the 90 days that began on the day of importation of the imported goods;

Section 161E

- (b) at the first trade level at which the derived goods were sold after that importation;
- (c) in circumstances where, in the opinion of the Collector, the purchaser of the derived goods:
 - (i) was not related to the vendor of the derived goods at the time of the sale; and
 - (ii) did not incur any production assist costs in relation to the derived goods; and
- (d) that was, in the opinion of the Collector, a sale of a sufficient number of units of derived goods as to permit an appropriate determination of the price per unit of the goods.

reference sale, in relation to derived goods, means:

- (a) where there was only one derived goods sale—that sale;
- (b) where:
 - (i) there were 2 or more such sales; and
 - (ii) derived goods were sold in those sales at the one unit price;each of those sales;
- (c) where:
 - (i) there were 2 or more such sales;
 - (ii) the derived goods were sold in those sales at 2 or more unit prices; and
 - (iii) a higher number of units of derived goods were sold in those sales at one of those unit prices than were sold in those sales at any other single particular unit price;the sale, or each of the sales, in which derived goods were sold at the particular unit price first-mentioned in subparagraph (iii);
- (d) where:
 - (i) there were 2 or more such sales;
 - (ii) derived goods were sold in those sales at 2 or more unit prices; and

Section 161E

(iii) an equal number of units of derived goods were sold in those sales at each of those unit prices;

the sale or sales in which the derived goods were sold at the lower or lowest of the unit prices; and

(e) where:

(i) there were 2 or more such sales;

(ii) derived goods were sold in those sales at 2 or more unit prices; and

(iii) an equal number of units of derived goods were sold in those sales at 2 or more of those unit prices and that number was not exceeded by the number of units of derived goods sold in those sales at any other single particular unit price;

the sale, or sales, at which derived goods were sold at the lower or lowest of the unit prices first-mentioned in subparagraph (iii).

unit price, in relation to derived goods derived from imported goods and sold in a derived goods sale, means the price of the derived goods in that sale:

(a) reduced by the sum of:

(i) value unrelated amounts, in relation to the derived goods;

(ii) deductible administrative costs in relation to the derived goods;

(iii) deductible financing costs in relation to the derived goods; and

(iv) the amount of the value added to the derived goods that is attributable to the assembly, packaging or further processing of the imported goods in Australia; and

(b) divided by the number of units of the derived goods.

161F Computed value

- (1) The computed value of imported goods is such part of the sum of the following amounts as a Collector considers should be apportioned to their production:
- (a) Australian arranged material costs;
 - (b) Australian arranged subsidiary costs;
 - (c) Australian arranged tooling costs;
 - (d) Australian arranged work costs;
 - (e) the value of all other goods used in their production and not included in paragraphs (a) to (d), inclusive;
 - (f) the costs, charges and expenses incurred by their producer in relation to their production and not included in paragraphs (a) to (e), inclusive;
 - (g) the profit and expenses (including all costs, direct or indirect, of marketing but not including costs and expenses included in paragraphs (a) to (f), inclusive) that are usually added to the sale for export to Australia of goods of the same class as the imported goods from the country of export of the imported goods, being a sale of goods by their producer to a purchaser who is not, at the time of sale, related to the producer;
 - (h) packing costs for materials and labour incurred in respect of the goods (including, but without limiting the generality of the foregoing, costs of fumigating, cleaning, coating, wrapping or otherwise preparing the goods for their exportation from a foreign country or otherwise placing them in the condition in which they are imported into Australia but not including the costs of any exempted pallet or exempted container concerned in their exportation), being costs that are not included in paragraphs (a) to (g), inclusive;
 - (j) foreign inland freight and foreign inland insurance that is usually added to a sale referred to in paragraph (g) and that is not included in paragraphs (a) to (h), inclusive.
- (2) In this section, *Australian arrange material costs, Australian arranged subsidiary costs, Australian arranged tooling costs* and
-

Section 161G

Australian arranged work costs, in relation to imported goods, have the meanings that *purchaser's material costs*, *purchaser's subsidiary costs*, *purchaser's tooling costs* and *purchaser's work costs* respectively, would have, in relation to imported goods, if the references in the 4 last-mentioned definitions to purchaser were references to a person in Australia.

161G Fall-back value

The fall-back value of imported goods is such value as a Collector determines, having regard to the other methods of valuation under this Division in the order in which those methods would ordinarily be considered under section 159 and of such other matters as the Collector considers relevant, but not having regard to any of the following matters:

- (a) the selling price in Australia of goods produced in Australia;
- (b) any system that provides for the acceptance for the purposes of this Act of the higher of 2 alternative values;
- (c) the price of goods on the domestic market of the country from which the imported goods were exported;
- (d) the cost of production of goods, other than the computed value of identical goods or similar goods;
- (e) the price of goods sold for export to a country other than Australia and not imported into Australia;
- (f) any system that provides for minimum values for the purposes of this Act;
- (g) arbitrary or fictitious values.

161H When transaction value unable to be determined

- (1) Without limiting section 160, a Collector cannot determine the transaction value of imported goods for the purposes of this Division, including, but without limiting the generality of the foregoing, section 161A or 161B, if the Collector:
 - (a) after reasonable inquiry, is not aware of any import sales transaction in relation to the goods;

Section 161H

- (b) has, in accordance with subsection (3), (5) or (7), decided that the transaction value of the goods cannot be determined; or
 - (c) is satisfied that the disposition or use of the goods by the purchaser is subject to restrictions, not being restrictions of the following kinds:
 - (i) restrictions imposed or required by, or by any public officer or authority acting in accordance with, any law in force in Australia;
 - (ii) restrictions that limit the geographical area in which the goods may be sold;
 - (iii) restrictions that do not substantially affect the commercial value of the goods.
- (2) Where, in relation to goods required to be valued, a Collector:
- (a) is satisfied that the purchaser and the vendor of imported goods were, at the time of the goods' import sales transaction, related persons; and
 - (b) considers that that relationship may have influenced the price of the goods;
- the Collector shall, by notice in writing served, personally or by post, on the purchaser of the goods:
- (c) advise the purchaser of:
 - (i) the view that the Collector has formed of the possible effect on the price of the goods of the relationship between the purchaser and the vendor;
 - (ii) the reasons for forming that view; and
 - (iii) the fact that, because of that view, the Collector may be required to decide under subsection (3) that the transaction value of the goods cannot be determined; and
 - (d) invite the purchaser to put before the Collector, within a period specified in the notice (not being a period of less than 28 days), such further information as the purchaser considers might serve to satisfy the Collector as to any of the matters set out in subsection (3).

Section 161H

- (3) On the expiration of the period specified in a notice under subsection (2), the Collector shall, unless the purchaser of the imported goods has satisfied the Collector that:
- (a) a relationship between the purchaser and the vendor of the goods did not influence the price of the goods; or
 - (b) the amount of the transaction value that would be determined in respect of the goods if the purchaser and the vendor had not been related at the time of the import sales transaction for the goods divided by the number of the units of the goods closely approximates, having regard to all relevant factors:
 - (i) the unit price within the meaning of section 161A of identical goods that were exported to Australia about the same time as the imported goods;
 - (ii) the unit price within the meaning of section 161B of similar goods that were exported to Australia about the same time as the imported goods;
 - (iii) the unit price of identical goods or similar goods sold in a contemporary sale within the meaning of section 161C as determined in accordance with that section; or
 - (iv) the computed unit price of identical goods or similar goods that were imported into Australia about the same time as the imported goods being the computed value of those identical or similar goods determined in accordance with section 161F divided by the number of units of those identical or similar goods;
- be taken to be unable to determine the transaction value of the goods.
- (4) Where, in relation to goods required to be valued, a Collector is of the opinion that the price at which the goods were sold in their import sales transaction is different from the price at which goods that are identical goods or similar goods to the first-mentioned goods would normally be sold in an import sales transaction similar to the first-mentioned import sales transaction, the Collector shall, by notice in writing served, personally or by post, on the purchaser:
- (a) advise the purchaser of the Collector's opinion; and

Section 161J

- (b) require the purchaser to satisfy the Collector, within the period specified in the notice, not being a period of less than 28 days, that the price difference was not designed to obtain a reduction of, or to avoid duty.
- (5) On the expiration of the period specified in a notice under subsection (4) in relation to imported goods, the Collector shall, unless the purchaser of the goods to whom the notice was given has satisfied the Collector as required by the notice, be taken to be unable to determine the transaction value of the goods.
- (6) Where, in relation to services provided in respect of goods required to be valued, a Collector is of the opinion that the services were provided in relation to the goods under the terms of their import sales transaction at a price different from the price normally paid for the provision of identical or similar services in relation to goods that are identical goods or similar goods to the first-mentioned goods, sold in an import sales transaction similar to the first-mentioned import sales transaction, the Collector shall, by notice in writing served, personally or by post, on the purchaser:
 - (a) advise the purchaser of the Collector's opinion; and
 - (b) require the purchaser to satisfy the Collector, within the period specified in the notice, not being a period of less than 28 days, that the price difference was not designed to obtain a reduction of, or to avoid duty.
- (7) On the expiration of the period specified in a notice under subsection (6) in relation to imported goods, the Collector shall, unless the purchaser of the goods to whom the notice was given has satisfied the Collector as required by the notice, be taken to be unable to determine the transaction value of the goods.

161J Value of goods to be in Australian currency

- (1) Where an amount that is, in accordance with this Division, required to be taken into account for the purpose of ascertaining a value of any imported goods is an amount in a currency other than Australian currency, the amount to be so taken into account shall be the equivalent in Australian currency of that amount,

Section 161J

ascertained according to the ruling rate of exchange in relation to that other currency in respect of the day of exportation of the goods.

- (2) For the purposes of this section, the Comptroller-General of Customs may specify, by notice published in the *Gazette*:
- (a) a rate that is to be deemed to be, or to have been, the ruling rate of exchange, in relation to any currency, in respect of a day, or of each day occurring during a period, preceding the day of publication of the notice; or
